

Collaborative Law as a Conflict Resolution Process

by Sophia

WHAT'S COVERED

There are a variety of methods for conflict resolution. Today, we'll learn more about collaborative law as one particular method. In this lesson, we will discuss:

1. Collaborative Law as a Conflict Resolution Process

Collaborative law, also known as divorce mediation, is a conflict resolution process used to settle financial and/or child care and custody issues between divorcing or separating couples.

Couples who are going to separate or divorce will work with their lawyers, and maybe some family professionals that they want to bring in as well, to achieve a mutually agreed upon settlement.

Collaborative Law

Couples work with lawyers to agree on a settlement

By going through this mediation process, couples avoid a court decision and thus any uncertainty or contested litigation. For this reason, collaborative law is a really positive alternative for divorcing couples.

Couples may bring in a mediator to help them collaborate and reach their agreement; however, any agreement that the mediator helps them reach needs to be evaluated and approved by the couples' lawyers.

TERM TO KNOW

2. What Collaborative Law Looks Like in Action

A divorce mediation always starts with a participation agreement, which is an agreement by a divorcing or separating couple required to initiate divorce mediation.

By signing this agreement, the couple binds itself to this process. The agreement also prevents the couple's lawyers from providing future representation in any kind of family case.

BIG IDEA

Collaborative law can be a wonderful alternative for divorcing couples if they're willing to work together towards a solution. Using this method allows couples to avoid both the contentiousness of court and the

uncertainty of a court decision.
